			Summer 2													The Grimm Tales Exploring your own interpretations. GCSE foundation
Additional notes	*As you would expect, Drama explores many themes and issues which may be challenging or difficult, for example, eating disorders is hard to swallow. Where a student does not feel comfortable, they should make themselves known to their drama teacher who can provide alternative arrangements where necessary.		According to students' pathway, they will follow Pathway option 1 or 2 above on a rotation over the course of the year.		The topics studied during Games and PE curriculum time are subject to variation, e.g. due to adverse weather conditions, so may be changed on short notice.						The topics studied during Games and PE curriculum time are subject to variation, e.g. due to adverse weather conditions, so may be changed on short notice.		In RE, students will explore both world and current issues. For example, when studying Religion and Science we explore abortion, euthanasia and suicide, fertility treatment and cloning, viticulture and environmental issues. We do this in an age appropriate and sensitive way. If you have any questions about any of the topics taught, please contact our RE department via Ecclefield Enquiries.		At times, topics may be staggered to alleviate pressure around provision of apparatus for practical science lessons.
